Abstracts

Light vehicles are forecast to see slower growth over the forecast period, with SUVs and crossovers representing 61% of total sales by 2027. The government's financial incentives, such as lower registration taxes favouring electric and zero-emission vehicles, will drive sales further over the forecast period. Shared mobility will also benefit from this. The expansion of roads and infrastructure will encourage wider use of public transport, due to better connectivity.

Euromonitor International's Mobility in Denmark report offers a comprehensive guide of the traditional and newly emerging mobility forms. The report is broken down into five key areas of industry research: automotive sales and ownership, electric and alternative fuel vehicles, shared mobility, public transport, and autonomous vehicles and connectivity. It provides the latest automotive sales and registration and shared mobility data over 2015-2020, allowing you to identify the sectors driving growth. It assesses the strategic analysis of key factors influencing the market - be they legislative, consumer lifestyle or economic. Forecasts in the reports are available to 2025.

Product coverage: Car Rental, Car Traffic Volume, Distances Travelled by Mode of Transport, Electric Charging Stations, Fuel Prices, Light Vehicle Sales, Light Vehicle Sales by Level of Autonomy (0-5), Shared Mobility, Vehicle Production, Vehicle Registrations, Vehicles in Use.

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.
