Abstracts

Light vehicle sales in Russia fell 10.5% in 2020 due to the COVID-19 pandemic. However, sales were already on a downward trajectory in 2019 after peaking in 2018. Over 2020-2025, light vehicle sales are expected to display a CAGR of 0.9%. Electric vehicles are still a niche market in Russia, with only 0.05% of all sales being electric in 2020. However, plans are being made to develop the industry with investment into electric charging infrastructure with 50,000 stations to be installed by 2030.

Euromonitor International's Mobility in Russia report offers a comprehensive guide of the traditional and newly emerging mobility forms. The report is broken down into five key areas of industry research: automotive sales and ownership, electric and alternative fuel vehicles, shared mobility, public transport, and autonomous vehicles and connectivity. It provides the latest automotive sales and registration and shared mobility data over 2015-2020, allowing you to identify the sectors driving growth. It assesses the strategic analysis of key factors influencing the market - be they legislative, consumer lifestyle or economic. Forecasts in the reports are available to 2025.

Product coverage: Car Traffic Volume, Distances Travelled by Mode of Transport, Electric Charging Stations, Fuel Prices, Light Vehicle Sales, Shared Mobility, Vehicle Production, Vehicle Registrations, Vehicles in Use.

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.

Why buy this report?

Get a detailed picture of the Mobility market;

Pinpoint growth sectors and identify factors driving change;

Understand the competitive environment, the market's major players and leading brands;

Use five-year forecasts to assess how the market is predicted to develop.

Euromonitor International has over 40 years' experience of publishing market research reports, business reference books and online information systems.
