Abstracts

In 2023, the government reformed its electric vehicles subsidy plan, considering factors like price, vehicle performance, warranty infrastructure and battery energy. This is set to boost the electric vehicle market, especially favouring local brands. Also, as people's mindsets are shifting from ownership to sharing, the markets for car rental and shared mobility are expanding rapidly. In public transport, subway fares in greater Seoul increased for the first time in eight years in 2023.

Euromonitor International's Mobility in South Korea report offers a comprehensive guide of the traditional and newly emerging mobility forms. The report is broken down into five key areas of industry research: automotive sales and ownership, electric and alternative fuel vehicles, shared mobility, public transport, and autonomous vehicles and connectivity. It provides the latest automotive sales and registration and shared mobility data over 2015-2020, allowing you to identify the sectors driving growth. It assesses the strategic analysis of key factors influencing the market - be they legislative, consumer lifestyle or economic. Forecasts in the reports are available to 2025.

Product coverage: Car Rental, Car Traffic Volume, Distances Travelled by Mode of Transport, Electric Charging Stations, Fuel Prices, Light Vehicle Sales, Light Vehicle Sales by Level of Autonomy (0-5), Shared Mobility, Vehicle Production, Vehicle Registrations, Vehicles in Use.

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.
