## Abstracts

Insights and data on the traditional automotive sector and the mobility industry can help businesses examine how changing travel patterns will impact future consumer behaviour. Growing climate pressures and rising urbanisation rates are pushing businesses to innovate and drive to the market alternative means of travel. Other insights on transport expenditure, internet access and attitudes to autonomous vehicles can help companies to align corporate strategies and spot new opportunities.

Euromonitor International's Mobility in United Arab Emirates report offers a comprehensive guide of the traditional and newly emerging mobility forms. The report is broken down into five key areas of industry research: automotive sales and ownership, electric and alternative fuel vehicles, shared mobility, public transport, and autonomous vehicles and connectivity. It provides the latest automotive sales and registration and shared mobility data over 2015-2020, allowing you to identify the sectors driving growth. It assesses the strategic analysis of key factors influencing the market - be they legislative, consumer lifestyle or economic. Forecasts in the reports are available to 2025.

Product coverage: Car Rental, Car Traffic Volume, Distances Travelled by Mode of Transport, Electric Charging Stations, Fuel Prices, Light Vehicle Sales, Light Vehicle Sales by Level of Autonomy (0-5), Shared Mobility, Vehicle Production, Vehicle Registrations, Vehicles in Use.

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.
