Abstracts

Casablanca and T?touan stand out as Morocco's economic hubs, while Agadir shows most potential for economic growth from 2022 to 2027. Over medium term, Casablanca and Fez are set to record the most significant internet penetration growth. Yet, the country's cities are set to face challenges. In the near term, concerns include a global economic slowdown, high inflation and financial tightening, while the long-term issues revolve around the strain on city infrastructure due to population growth.

Euromonitor International's City Review reports analyse key trends and developments in 126 world's major cities. They provide localised city information in terms of economy, consumer lifestyles, housing and transport and city environment and offer valuable insights for strategic planning.

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.
