## Abstracts

The year 2023 saw a notable trend of broad increases in retail price points for nappies, diapers, and pants in Norway. This surge was primarily driven by cost inflation across various aspects of production, including energy, material sourcing, labour, logistics, and supply chain constraints. While there was a moderation in price spikes observed in 2022, inflation remained elevated throughout 2023, further amplifying the magnitude of value growth rates in the product area.
