## Abstracts

With the general focus of many Indonesian consumers heavily oriented towards health and wellness and, in particular, improving their diets, since the onset of the COVID-19 pandemic, interest in healthier types of breakfast food has increased dramatically. Naturally, the category of naturally healthy packaged food to have benefited the most from this situation is NH high fibre breakfast cereals, with the healthy profile and high fibre content of hot cereals, muesli and granola all attracting the...

Euromonitor International's Naturally Healthy Packaged Food in Indonesia report tracks the developments of health-associated product types and the healthy-option positioning of competing brands across different food sectors. It provides the latest retail sales data 2017-2021, allowing you to compare health and wellness categories with each other or in the context of the total market for a sector. It identifies the leading companies, the leading brands and offers strategic analysis of key factors influencing the market- be they new product developments, legislative context or lifestyle influences. Forecasts to 2026 illustrate how the market is set to change.
