Abstracts

The availability and creative use of technology is a chief driver of foodservice globally. “Connectivity” has exposed consumers to new cuisines, dining styles and a plethora of modern conveniences, while it allows operators to adapt to changing market conditions. This report highlights three key use-cases of foodservice technology with new concept examples from around the world. Together, these concepts point to what is next and offer insight into high-level, forward-looking global trends.

Euromonitor International's New Concepts in Consumer Foodservice: Technology and the Future of Dining global briefing offers an insight into to the size and shape of the Consumer Foodservice market, highlights buzz topics, emerging geographies, categories and trends as well as pressing industry issues and white spaces. It identifies the leading operators and brands, offers strategic analysis of key factors influencing the operating environment - be they economic/lifestyle influences, new foodservice concepts, outlet locations, menu innovation or format development. The entire industry is considered, including both chained and independent operators. Forecasts illustrate how the market is set to change and what is the criteria for success.

Product coverage: Consumer Foodservice by Location, Consumer Foodservice by Type.

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.
