## Abstracts

Following years of austerity measures to curb its fiscal deficit, Spain's infrastructure expenditure saw a notable increase in 2019, stimulating demand for cement and concrete products. In the budget for 2019, Spain allocated EUR10 billion for infrastructure projects, up by 18% over the previous year. The majority of the funding was allocated to railways, roads, ports and airports. The expansion in infrastructure expenditure boosted demand for cement and concrete in 2019.
