Abstracts

In 2030, the population of North America will reach 401 million, an increase of 12.2% from 2015. North America will be the third oldest region in the world in 2030 when its 65+ population will make up over a fifth of the population. Positive, albeit slowing, natural change and rising net migration will ensure that the population experiences moderate growth in 2015-2030
