Abstracts

Organic beverages recorded an underwhelming performance in 2021 after the category registered declining sales at the peak of the COVID-19 pandemic during 2020. Volume sales of organic beverages continued to decline during 2021 as the growth recorded in value sales was insufficient to fully cover the losses generated in the category in value terms during the previous year. The pressure that the category faces can be attributed mainly to its small size and incipient stage of development, which mea...

Euromonitor International's Organic Beverages in Indonesia report tracks the developments of health-associated product types and the healthy-option positioning of competing brands across different food sectors. It provides the latest retail sales data 2017-2021, allowing you to compare health and wellness categories with each other or in the context of the total market for a sector. It identifies the leading companies, the leading brands and offers strategic analysis of key factors influencing the market- be they new product developments, legislative context or lifestyle influences. Forecasts to 2026 illustrate how the market is set to change.
