Abstracts

Paediatric consumer health is poised for solid growth in current value terms in Brazil in 2023, maintaining a rate of increase similar to that observed in 2022. While in 2022, in-person schooling exposed children to colds and flu, in 2023, another significant driver of consumption in the category has emerged: cases of arboviruses (dengue, zika, and chikungunya). Dengue cases, in particular, have captured widespread attention in Brazil. Presently, the probable cases of these diseases have surpass...

Euromonitor International's Paediatric Consumer Health in Brazil report offers a comprehensive guide to the size and shape of the market at a national level.
