## Abstracts

Notwithstanding the decline in the birth rate and the contraction in the infant population, which has had a direct negative impact on categories such as milk formula, it has not depressed demand for upgraded consumption in paediatric consumer health. In addition, the continuous growth in purchasing power amongst younger parents has been driving up the average price of paediatric vitamins and dietary supplements, helping to drive current value growth. International and imported products are still...

Euromonitor International's Paediatric Consumer Health in China report offers a comprehensive guide to the size and shape of the market at a national level.
