Abstracts

Sustainability has emerged as a major trend in the packaging industry in South Africa due to a confluence of factors. These include: growing environmental concerns; consumer demand for eco-friendly products; government regulations promoting sustainable practices; the potential for long-term cost savings; international market expectations; the desire to enhance brand image and market competitiveness; resource scarcity challenges; and the global awareness of issues like climate change and plastic...

Euromonitor International's Packaging in South Africa report offers insight into key trends and developments in the industry. The report also examines trends and prospect for various pack types and closures: metal packaging, rigid plastic, glass, liquid cartons, paper-based containers; flexible packaging.

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.
