Abstracts

The UK's packaging industry is currently influenced by two prominent trends. Firstly, the widespread use of flexible plastic packaging, especially in areas like cheese packaging, which is being driven by its cost-effectiveness, convenience and transparency. Thin wall plastic containers are also on the rise, particularly for soft cheeses and spreads, offering more rigid solutions.

Euromonitor International's Packaging in United Kingdom report offers insight into key trends and developments in the industry. The report also examines trends and prospect for various pack types and closures: metal packaging, rigid plastic, glass, liquid cartons, paper-based containers; flexible packaging.

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.
