## Abstracts

With USD3 billion in sales in 2017, the personal wipes market in North America leads all other regions. However, growth is expected to slow as the market matures and competition heats up. Major industry players are experiencing pressure from smaller brands, private label, and e-commerce. Though baby wipes account for the majority of sales, smaller categories such as cosmetic wipes and moist toilet wipes have grown faster, with significant potential for further growth.

Euromonitor International's Personal Wipes in North America global briefing offers an insight into to the size and shape of the tissue and hygiene market, highlights buzz topics, emerging regions, countries and categories as well as pressing industry issues and white spaces. It identifies the opportunity zones within tissue and hygiene, analyses leading companies and brands, assesses the importance of private label and offers strategic analysis of major factors influencing the market - be they new product developments, economic/lifestyle/environmental influences, distribution or pricing issues. Forecasts illustrate how the market is set to change and criteria for success.

**Product coverage:** Away-from-Home Tissue and Hygiene, Retail Tissue and Hygiene, Total Tissue and Hygiene.

**Data coverage:** market sizes (historic and forecasts), company shares, brand shares and distribution data.
