Personal care appliances saw an increase in volume terms in 2017. Besides daily routine tasks such as facial shaving and drying hair, consumers are eager to use more personal care appliances to pursue beauty and health. More women, for instance, are using women's shavers and depilators in the summer, whilst men are not only regularly using men's shavers, but also hair and beard trimmers to achieve better personal grooming. On the other hand, oral care appliances, such as battery and electric too...

Euromonitor International's Personal Care Appliances in China report offers a comprehensive guide to the size and shape of the market at a national level. It provides the latest retail sales data 2012-2016, allowing you to identify the sectors driving growth.
