Abstracts

Personalisation's appeal is intensifying as modern consumers demand greater convenience and efficiency. Increasing awareness of the importance of nutrition for general health invites businesses' innovations to create more granular tech solutions that not only take into account individual lifestyles but also analyse one's body biomarkers. Although zooming into indicators such as DNA attracts investments, consumer surveys indicate growing reservations to share deeply personal data.

Euromonitor International's Personalisation and Digital Wellness in Food and Nutrition global briefing provides a comprehensive overview of the Staple Foods market, providing insight on sales and market potential, retail distribution and company and brand shares. Analysis identifies emerging geographies alongside growth opportunities in the most developed, highest value countries. It also offers strategic analysis of the key trends shaping the industry and consumer demand, such as health and wellness, sustainability, the evolution of eating occasions, in addition to ongoing considerations of convenience and value-for-money in the post-pandemic world. Insight into how these trends are shaping demand informs forecasts to 2027, clearly indicating how the market is expected to change.

Product coverage: Baked Goods, Breakfast Cereals, Processed Fruit and Vegetables, Processed Meat, Seafood and Alternatives to Meat, Rice, Pasta and Noodles.

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.

Why buy this report?

Get a detailed picture of the Staple Foods market;

Pinpoint growth sectors and identify factors driving change;

Understand the competitive environment, the market's major players and leading brands;

Use five-year forecasts to assess how the market is predicted to develop.

Euromonitor International has over 40 years' experience of publishing market research reports, business reference books and online information systems.
