## **Abstracts**

Pet care recorded further growth in current value terms in 2023, despite an overall decline in volume. While inflation remained a key factor in boosting value sales, higherquality, premium products with added benefits also supported growth to some extent. These took the form of recipes to cater for the needs of specific breeds, age groups, lifestyles or health conditions, as well as those with functional claims, such as shinier fur, brighter feathers or stronger joints, for example.
