## Abstracts

In Denmark, the pet population is declining due to rising living costs and a return to pre-pandemic lifestyles. 2023 registered a decrease in new dog registrations, signalling a probable reduction in the overall canine population by the end of 2024. There is also a noticeable shift from bigger dog breeds towards smaller ones. The population decline is not confined to dogs alone; smaller pets, in general, are seeing a decrease with little indication of turnaround.
