Abstracts

Growth in plant-based dairy slowed in 2022, following the relatively strong rebound seen in 2021, after sales had shown a marked decline in 2020, mainly due to the pandemic-induced slump in the Chinese market in this year. Other plant-based milk, thanks to its dominance in China, has slightly higher sales than soy drinks in the region, while plant-based yoghurt and cheese remain very small categories. Other plant-based milk will be driving overall market growth in the region in 2022-2027.

Euromonitor International's Plant-Based Dairy in Asia Pacific global briefing provides a comprehensive overview of the Dairy Products and Alternatives market, providing insight on sales and market potential, retail distribution and company and brand shares. Analysis identifies emerging geographies alongside growth opportunities in the most developed, highest value countries. It also offers strategic analysis of the key trends shaping the industry and consumer demand, such as health and wellness, sustainability, the evolution of eating occasions, in addition to ongoing considerations of convenience and value-for-money in the post-pandemic world. Insight into how these trends are shaping demand informs forecasts to 2026, clearly indicating how the market is expected to change.

Product coverage: Baby Food, Dairy, Plant-based Dairy.

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.

Why buy this report?

Get a detailed picture of the Dairy Products and Alternatives market;

Pinpoint growth sectors and identify factors driving change;
