Abstracts

Earlier in the review period, prior to the pandemic, plant-based milk – the only product in plant-based dairy currently with visible sales – had been seeing strong growth, especially the dominant product type of soy milk, as many Filipinos were becoming increasingly influenced by the health and wellness trend. However, despite the belief among some consumers that such products are effective for boosting immunity, especially when fortified and particularly in comparison with regular dairy product...

Euromonitor International's Plant-based Dairy Packaging in Philippines report offers insight into key trends and developments driving packaging across the category. The report also examines trends and prospect for various pack types and closures: metal packaging, rigid plastic, glass, liquid cartons, paper-based containers; flexible packaging.

Product coverage: Plant-based Cheese, Plant-based Milk, Plant-based Yoghurt.

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.
