Abstracts

Total packaging volumes for plant-based dairy continued to rise in 2022, with growth seen across all pack types, although plant-based milk remained the only category with notable volumes, as plant-based yoghurt and cheese are still in their early stages of development. Growing awareness of lactose intolerance in the country, alongside a better understanding of new types of diets, such as vegan, vegetarian, and flexitarian, has boosted the recognition of plant-based milk in South Korea. This supp...

Euromonitor International's Plant-based Dairy Packaging in South Korea report offers insight into key trends and developments driving packaging across the category. The report also examines trends and prospect for various pack types and closures: metal packaging, rigid plastic, glass, liquid cartons, paper-based containers; flexible packaging.
