Abstracts

Processed fruit and vegetables is set to experience growth in current value terms in 2023, primarily driven by rising unit prices. However, volume consumption is also expected to see a slight increase, due to more people opting to cook at home in response to the rising cost of living. Elevated unit prices have been influenced by factors such as rising production costs, labour issues, and weather conditions affecting agriculture. Furthermore, the competition from fresh food has had a notable impact.

Euromonitor International's Processed Fruit and Vegetables in Australia report offers in-depth knowledge of the market at a national level, providing local insight and understanding unavailable elsewhere. In addition to the latest retail sales data 2018-2022, it identifies the leading companies, brands and retail outlets, and assesses the key trends and demographic shifts behind consumer demand and sales growth.
