Abstracts

Given further impetus by consumers paying increasing attention to wellness during the COVID-19 pandemic, a growing interest in health-related foods has put chicken in focus as the best source of protein for building muscle. This has therefore supported growth in the packaging unit volumes of flexible plastic used in frozen processed meat in both 2020 and 2021. While flexible plastic is the main pack type in this product area, the less widely used folding cartons and other plastic trays have been...

Euromonitor International's Processed Meat and Seafood Packaging in South Korea report offers insight into key trends and developments driving packaging across the category. The report also examines trends and prospect for various pack types and closures: metal packaging, rigid plastic, glass, liquid cartons, paper-based containers; flexible packaging.
