Abstracts

Processed fruit and vegetables packaging volumes saw a second year of decline in 2022, falling after an exceptional year of growth in 2020 when consumers stockpiled during the pandemic; however, volumes remained above the pre-pandemic level. Although metal food cans is the leading pack type for processed fruit and vegetables in the US, thin wall plastic containers saw an increase in pack type share in 2022. This can be attributed to a few reasons. For instance, when compared with glass jars and...

Euromonitor International's Processed Fruit and Vegetables Packaging in USA report offers insight into key trends and developments driving packaging across the category. The report also examines trends and prospect for various pack types and closures: metal packaging, rigid plastic, glass, liquid cartons, paper-based containers; flexible packaging.
