Abstracts

Frozen processed fruit and vegetables packaging recorded double-digit percentage growth in its unit volumes for the third year in a row in 2022 in Turkey. This was due to a growing awareness of the nutritional benefits of frozen fruits and vegetables, which are often perceived as a convenient and healthy alternative to fresh produce. Frozen products offer longer shelf life and reduced food waste, making them an attractive choice for consumers looking to minimise their environmental footprint. In...

Euromonitor International's Processed Fruit and Vegetables Packaging in Turkey report offers insight into key trends and developments driving packaging across the category. The report also examines trends and prospect for various pack types and closures: metal packaging, rigid plastic, glass, liquid cartons, paper-based containers; flexible packaging.
