Abstracts

In 2022, flexible plastic continued to be the main pack type used for processed meat and seafood for various reasons. Flexible plastic packaging provides a barrier against external elements such as air, moisture and contaminants. This helps in preventing spoilage, maintaining the freshness of the product. This pack type can be easily moulded and shaped into various packaging formats to accommodate different types of meats and seafood. When compared to other pack types, flexible plastic packaging...

Euromonitor International's Processed Meat and Seafood Packaging in Argentina report offers insight into key trends and developments driving packaging across the category. The report also examines trends and prospect for various pack types and closures: metal packaging, rigid plastic, glass, liquid cartons, paper-based containers; flexible packaging.
