Abstracts

Metal food cans continue to be the main packaging format used in both shelf stable meat and shelf stable seafood in Poland. Canned seafood, particularly fish, is a low-acid meal ingredient or solution that rapidly promotes the growth of microbes if not properly packed. Metal food cans, which are hermetically sealed, solve this problem by providing maximum freshness and minimising contamination because they are impermeable and can resist heat. Food packed in metal food cans also does not require...

Euromonitor International's Processed Meat and Seafood Packaging in Poland report offers insight into key trends and developments driving packaging across the category. The report also examines trends and prospect for various pack types and closures: metal packaging, rigid plastic, glass, liquid cartons, paper-based containers; flexible packaging.

Product coverage: Meat and seafood substitutes inc Tofu, Processed Meat, Processed Seafood.

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.
