## Abstracts

E-commerce in Singapore experienced a marginal decline in value sales in 2023 due to the normalisation of shopping habits. This was expected, given the sharp growth recorded by the channel during the pandemic, when consumers had limited alternatives and were driven by promotions and product discounts offered by leading players present on marketplace e-commerce.

Euromonitor International's Retail E-Commerce in Singapore report offers insight into key trends and developments driving the industry. The report examines all retail channels to provide sector insight. Channels include hypermarkets, supermarkets, discounters, convenience stores, mixed retailers, health and beauty retailers, clothing and footwear retailers, furniture and furnishing stores, DIY and hardware stores, durable goods retailers, leisure and personal goods retailers. There are profiles of leading retailers, with analysis of their performance and the challenges they face. There is also analysis of non-store retailing: vending; homeshopping; internet retailing; direct selling, as available.

**Product coverage:** Retail E-Commerce by Product, Retail E-Commerce by Type.

**Data coverage:** market sizes (historic and forecasts), company shares, brand shares and distribution data.

### Why buy this report?

Get a detailed picture of the Retail E-Commerce market;

Pinpoint growth sectors and identify factors driving change;

Understand the competitive environment, the market's major players and
