## Abstracts

In 2022, retail e-commerce continued to gain significant value share in Uzbekistan. However, its penetration level still lagged behind neighbouring countries such as Kazakhstan. Several factors hindered the further development of retail e-commerce in Uzbekistan, including consumer preference for buying retail offline, lack of trust in electronic services and stores, grey imports, and inadequate logistics infrastructure. On the other hand, Uzbekistan has seen an increase in the number of smartphones. Euromonitor International's Retail E-Commerce in Uzbekistan report offers insight into key trends and developments driving the industry. The report examines all retail channels to provide sector insight. Channels include hypermarkets, supermarkets, discounters, convenience stores, mixed retailers, health and beauty retailers, clothing and footwear retailers, furniture and furnishing stores, DIY and hardware stores, durable goods retailers, leisure and personal goods retailers. There are profiles of leading retailers, with analysis of their performance and the challenges they face. There is also analysis of non-store retailing: vending; homeshopping; internet retailing; direct selling, as available.

**Product coverage:** Retail E-Commerce by Product, Retail E-Commerce by Type.

**Data coverage:** market sizes (historic and forecasts), company shares, brand shares and distribution data.

### Why buy this report?

Get a detailed picture of the Retail E-Commerce market;

Pinpoint growth sectors and identify factors driving change;

Understand the competitive environment, the market's major players and
