## Abstracts

Retail generated positive growth in 2022 despite high inflation and pressure on consumer spending. Higher levels of investment from key players boosted chained grocery retailing and e-commerce as consumers become more accustomed to more modern and convenient forms of shopping. Nonetheless, the lower tax applied to independent businesses means lower prices in small local grocers and open markets, while the preference for informal retailing continues to undermine the industry's growth potential.

Euromonitor International's Retail in Bangladesh report offers insight into key trends and developments driving the industry. The report examines all retail channels to provide sector insight. Channels include hypermarkets, supermarkets, discounters, convenience stores, mixed retailers, health and beauty retailers, clothing and footwear retailers, furniture and furnishing stores, DIY and hardware stores, durable goods retailers, leisure and personal goods retailers. There are profiles of leading retailers, with analysis of their performance and the challenges they face. There is also analysis of non-store retailing: vending; homeshopping; internet retailing; direct selling, as available.

**Product coverage:** Retail E-Commerce, Retail Offline.

**Data coverage:** market sizes (historic and forecasts), company shares, brand shares and distribution data.
