## Abstracts

The War in Ukraine had a strong impact on Latvia in 2022, creating conditions for high inflation and economic and political uncertainty. This, in turn, affected consumer priorities and spending patterns in retail arenas. Meanwhile, retail in Latvia was impacted by ongoing digitalisation, which continued to reshape the retail landscape. This was characterised by the evolution of both e-commerce and offline channels and a shift to omnichannel strategies. Sustainability concerns and initiatives have also influenced the industry. Euromonitor International's Retail in Latvia report offers insight into key trends and developments driving the industry. The report examines all retail channels to provide sector insight. Channels include hypermarkets, supermarkets, discounters, convenience stores, mixed retailers, health and beauty retailers, clothing and footwear retailers, furniture and furnishing stores, DIY and hardware stores, durable goods retailers, leisure and personal goods retailers. There are profiles of leading retailers, with analysis of their performance and the challenges they face. There is also analysis of non-store retailing: vending; homeshopping; internet retailing; direct selling, as available.

**Product coverage:** Retail E-Commerce, Retail Offline.

**Data coverage:** market sizes (historic and forecasts), company shares, brand shares and distribution data.

### Why buy this report?

Get a detailed picture of the Retail market;

Pinpoint growth sectors and identify factors driving change;

Understand the competitive environment, the market's major players and leading brands;

Use five-year forecasts to assess how the market is predicted to develop.
