Abstracts

The economic crisis continues to impact the Lebanese retailing industry, with negative value growth in constant price terms seen across all categories in 2022. Consumers are spending much less than prior to the onset of the crisis, with demand centred on the absolute essentials and the cheapest options. Demand for luxury goods and mainstream global brands remains strong among a sizeable clique of affluent elites, while many mass consumers have resorted to informal channels and second-hand items.

Euromonitor International's Retail in Lebanon report offers insight into key trends and developments driving the industry. The report examines all retail channels to provide sector insight. Channels include hypermarkets, supermarkets, discounters, convenience stores, mixed retailers, health and beauty retailers, clothing and footwear retailers, furniture and furnishing stores, DIY and hardware stores, durable goods retailers, leisure and personal goods retailers. There are profiles of leading retailers, with analysis of their performance and the challenges they face. There is also analysis of non-store retailing: vending; homeshopping; internet retailing; direct selling, as available.

Product coverage: Retail E-Commerce, Retail Offline.

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.
