Retail tissue saw a current value increase in 2017 which was comparable to the growth rate observed in 2016, as well as similar to the CAGR seen during the review period. Whilst paper towels saw a strong performance, which was attributable to less emphasis on larger pack sizes, toilet paper held by far the highest value share within retail tissue in 2017, and thus the performance of this category had a significant impact on the overall performance of retail tissue. With continued population growth.
