Abstracts

Retailing as a whole benefitted from the easing of COVID-19 restrictions in 2021, with healthy current value growth, following from a slight decline in value sales in 2020. The economic recovery from the pandemic played a key role in boosting value sales, as did an element of pent-up spending, as consumers splurged on items such as beauty products now that society was opened up once again. Higher tourist numbers than expected also boosted value sales.

Euromonitor International's Retailing in Slovenia report offers insight into key trends and developments driving the industry. The report examines all retail channels to provide sector insight. Channels include hypermarkets, supermarkets, discounters, convenience stores, mixed retailers, health and beauty retailers, clothing and footwear retailers, furniture and furnishing stores, DIY and hardware stores, durable goods retailers, leisure and personal goods retailers. There are profiles of leading retailers, with analysis of their performance and the challenges they face. There is also analysis of non-store retailing: vending; homeshopping; internet retailing; direct selling, as available.

Product coverage: Non-Store Retailing, Store-Based Retailing.

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.

Why buy this report?

Get a detailed picture of the Retailing market;

Pinpoint growth sectors and identify factors driving change;

Understand the competitive environment, the market's major players and

leading brands;

Use five-year forecasts to assess how the market is predicted to develop.
