Abstracts

Sanitary protection recorded positive retail volume and value growth in 2022, driven by the greater resumption of social activities, which benefitted overall demand. The reopening of local society following months of strict lockdowns resulted in pent-up spending, as Chileans increased the amount of time they spent socialising outside of the home, which therefore drove up the need to make more frequent purchases of sanitary protection. Euromonitor International's Sanitary Protection in Chile report offers a comprehensive guide to the size and shape of the market at a national level. It provides the latest retail sales data 2018-2022, allowing you to identify the sectors driving growth. It identifies the leading companies, the leading brands and offers strategic analysis of key factors influencing the market – be they new product developments, distribution or pricing issues. Forecasts to 2027 illustrate how the market is set to change.
