## Abstracts

Glass jars remained a major pack type in sauces, dips and condiments in 2022 for a number of reasons. Glass is an inert material that does not interact chemically with the product content, ensuring that the flavour and quality of the sauces, dips or condiments are preserved. This is particularly important in a hot and humid climate like the United Arab Emirates, where maintaining product freshness is crucial.

Euromonitor International's Sauces, Dips and Condiments Packaging in United Arab Emirates report offers insight into key trends and developments driving packaging across the category. The report also examines trends and prospect for various pack types and closures: metal packaging, rigid plastic, glass, liquid cartons, paper-based containers; flexible packaging.

Product coverage: Cooking Ingredients and Condiments, Dips, Other Sauces and Condiments, Pickled Products, Sauces.

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.
