## Abstracts

Open vaping systems in Chile is a category characterised by a very high level of illegality and “grey” zones. Falsification can be seen across open vaping systems charging and vapourising devices and e-liquids. E-liquids are allowed in Chile but those containing nicotine are considered medicines and so a vendor requires special authorisation to be able to sell them. However, the Institute of Public Health (ISP) in Chile has not received any requests for authorisation nor conducted any studies. S...

Euromonitor International's Smokeless Tobacco and Vapour Products in Chile report offers a comprehensive guide to the size and shape of the market at a national level. It provides the latest retail sales data 2013-2017, allowing you to identify the sectors driving growth.
