Abstracts

Open vaping systems, the largest category in vapour products, is witnessing a move towards more powerful devices which produce more smoke. However, this trend remains a concern. Although it is argued that vaping is less harmful than smoking traditional tobacco, the smoke intake from vaping is much higher. Trade associations and health organisations have recognised this and may push for further regulation of electronic cigarettes, open vaping systems in particular.

Euromonitor International's Smokeless Tobacco and Vapour Products in Germany report offers a comprehensive guide to the size and shape of the market at a national level. It provides the latest retail sales data 2013-2017, allowing you to identify the sectors driving growth.
