Abstracts

Vietnam is predicted to see GDP growth of 4.5% by the end of 2023, compared to the initial forecast of 6.5% at the beginning of the year, as per the General Statistical Office study. Soft labour markets and concerns about an impending global recession have led to a more conservative consumer behaviour in 2023, with increased savings and decreased spending on non-essential items such as soft drinks. The government looked to support companies and consumers by reducing the VAT rate from 10% to 8% s...
