Abstracts

The landscape for spectacles is set to see positive retail value growth in 2023. This is not only driven by the growing demand for spectacle frames and spectacle lenses by consumers as their working and social lives return to normal following the outbreak of COVID-19, but this is also the outcome of growing average unit prices related to high inflation in the country. With higher transport and raw material costs, leading brands raised prices, passing costs onto consumers.

Euromonitor International's Spectacles in Turkey report offers a comprehensive guide to the size and shape of the market at a national level. It provides the latest retail sales data (2018-2022), allowing you to identify the sectors driving growth.
