Abstracts

Following the sales decline in 2020 against a backdrop of gym closures and lockdowns due to the pandemic, a recovery was seen in 2021 as vaccination programmes rolled out across Western Europe, with stronger growth then being recorded in 2022 as society was finally returning to normality. A dynamic performance is expected over the forecast period, with most areas of sports nutrition, and particularly sports protein powder, recording stronger CAGRs in 2022-2027 than over the historic period.

Euromonitor International's Sports Nutrition in Western Europe global briefing examines the size, growth trends and potential opportunities in the Consumer Health market. The strategic analyses include assessing the impacts of changing regulations, research breakthroughs and public health concerns on both the market and leading companies. Consumer attitudes towards the products and their personal healthcare needs are also explored.

Product coverage: Allergy Care, Herbal/Traditional Products, OTC, Paediatric Consumer Health, Sports Nutrition, Vitamins and Dietary Supplements, Weight Management and Wellbeing.

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.

Why buy this report?

Get a detailed picture of the Consumer Health market;

Pinpoint growth sectors and identify factors driving change;

Understand the competitive environment, the market's major players and

leading brands;

Use five-year forecasts to assess how the market is predicted to develop.
