# **Abstracts**

Supermarkets continued to face strong competition from discounters in Denmark in 2023, as many consumers looked to save on their grocery shopping due to the financial impact of higher energy prices and increasing interest rates. On the other side, supermarkets also face competition from hypermarkets, which tend to have prices similar to supermarkets, but offer a much wider selection of products. Facing competition from two sides, Danish supermarkets saw declining sales in 2023.

Euromonitor International's Supermarkets in Denmark report offers insight into key trends and developments driving the industry. The report examines all retail channels to provide sector insight. Channels include hypermarkets, supermarkets, discounters, convenience stores, mixed retailers, health and beauty retailers, clothing and footwear retailers, furniture and furnishing stores, DIY and hardware stores, durable goods retailers, leisure and personal goods retailers. There are profiles of leading retailers, with analysis of their performance and the challenges they face. There is also analysis of non-store retailing: vending; homeshopping; internet retailing; direct selling, as available.

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.
