Abstracts

The home cushions consumers from a mindset of resource abundance to one of short-term crisis, ultimately leading to long-term compromise. The sustainable home will be centred on the adoption of new technologies, with properties integrating reuse, recovery and recycling solutions across energy, food, water and all waste materials as a way of providing our homes with more sustainable solutions. This is about scarcity and the realisation that current systems are no longer fit for purpose.

Euromonitor International's Sustainable Home global briefing offers an insight into to the size and shape of the Home Care market, highlights buzz topics, emerging regions, countries and categories as well as pressing industry issues and white spaces. It identifies the opportunity zones within home care, analyses leading companies and brands and offers strategic analysis of major factors influencing the market - be they new product developments, packaging/ format /ingredients innovations, economic/lifestyle/environmental influences, distribution or retail pricing issues. Forecasts illustrate how the market is set to change and criteria for success.

Product coverage: Air Care, Bleach, Dishwashing, Home Insecticides, Laundry Care, Polishes, Surface Care, Toilet Care.

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.
