## Abstracts

The higher costs of raw ingredients, glass packaging, energy and logistics weighed significantly on the high increases in prices of products on retailers' shelves. As a result, there is expected to be only a very marginal rise in overall retail volume sales of sweet spreads over 2023, following a decline in 2022. Although price growth was still high, it was lower than in 2022 which made products seem more affordable in some consumers' eyes.
