Abstracts

As an archipelago, air transportation is still regarded as the most efficient mode of transport to travel across land and sea in Indonesia. Air transportation is also increasingly affordable for a growing number of people as low cost carriers continue to enlarge their businesses by adding more routes, increasing flight frequencies and fleet sizes. In addition, a number of new carriers have entered the area recently. However, other modes of transport still registered positive current value...

Euromonitor International's Transportation in Indonesia report offers a comprehensive guide to the size and shape of the market at a national level. It provides the latest market size data 2009-2013, allowing you to identify the sectors driving growth. It identifies the leading companies and offers strategic analysis of key factors influencing the market - be they new legislative, technology or pricing issues. Background information on disposable income, annual leave and holiday taking habits is also included. Forecasts to 2018 illustrate how the market is set to change.

Product coverage: Transportation by Category, Transportation by Channel.

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.
