Abstracts

Low cost carriers experienced the strongest current value growth in transportation in Spain, recording growth of 3% in 2013. This was due to an increased offer of low cost routes to European cities, together with an increased number of inbound tourists. Air remains the most popular way for international tourists to visit Spain while most Spaniards prefer to travel by car within the country.

Euromonitor International's Transportation in Spain report offers a comprehensive guide to the size and shape of the market at a national level. It provides the latest market size data 2009-2013, allowing you to identify the sectors driving growth. It identifies the leading companies and offers strategic analysis of key factors influencing the market - be they new legislative, technology or pricing issues. Background information on disposable income, annual leave and holiday taking habits is also included. Forecasts to 2018 illustrate how the market is set to change.

Product coverage: Transportation by Category, Transportation by Channel.

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.
