## Abstracts

The initial impact of COVID-19 in Slovenia started at the beginning of March with the closure of bars and restaurants. As the situation in Italy was critical compared with the rest of Europe, the Slovenian government banned all travel with Italy. This was later followed by a ban of all air travel with neighbouring countries Austria and Croatia as well as the closure of borders. As time progressed, the government finally restricted all non-essential travel between Slovenia and any other country.

Euromonitor International's Travel in Slovenia report offers a comprehensive guide to the size and shape of the market at a national level. It provides the latest market size data 2015-2019, allowing you to identify the sectors driving growth. It identifies the leading companies and offers strategic analysis of key factors influencing the market - be they new legislative, technology or pricing issues. Background information on disposable income, annual leave and holiday taking habits is also included. Forecasts to 2024 illustrate how the market is set to change.

**Product coverage:** Activities and Experiences (Destination), Lodging, Online Travel Sales and Intermediaries, Tourism Flows, Travel Modes, Traveller Profiles.

**Data coverage:** market sizes (historic and forecasts), company shares, brand shares and distribution data.
