Abstracts

Having plunged by almost a quarter during 2020, the retail constant value sales (2021 prices) of variety stores saw no more than a partial recovery in 2021, with the shift in demand to e-commerce that was spurred by the pandemic the main driver of this. The pandemic also led many variety store chains to pay more attention to internet retail. During 2020, variety stores also struggled with product availability and delivery as a result of lockdown.

Euromonitor International's Variety Stores in Mexico report offers insight into key trends and developments driving the industry. The report examines all retail channels to provide sector insight. Channels include hypermarkets, supermarkets, discounters, convenience stores, mixed retailers, health and beauty retailers, clothing and footwear retailers, furniture and furnishing stores, DIY and hardware stores, durable goods retailers, leisure and personal goods retailers. There are profiles of leading retailers, with analysis of their performance and the challenges they face. There is also analysis of non-store retailing: vending; homeshopping; internet retailing; direct selling, as available.

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.
